

The initial display when entering the webpage for the first time.

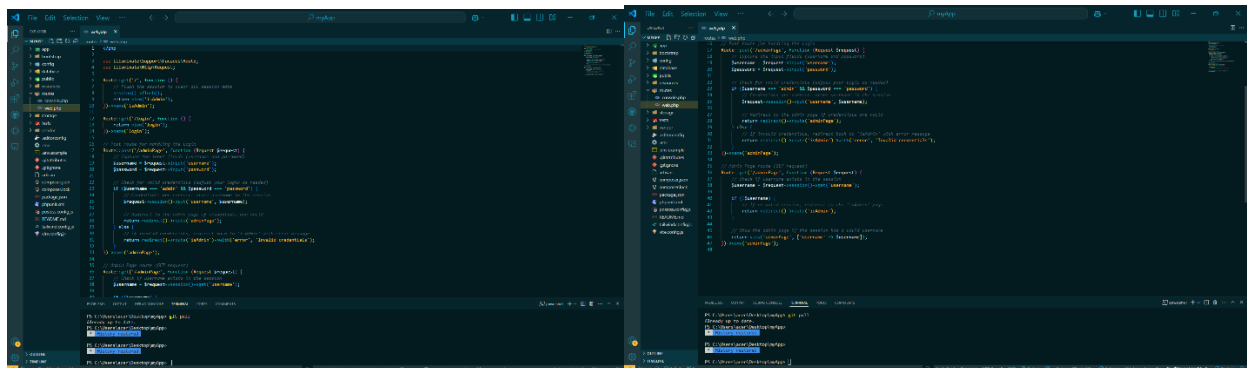

When the user chooses the Admin option, they will be redirected to this display

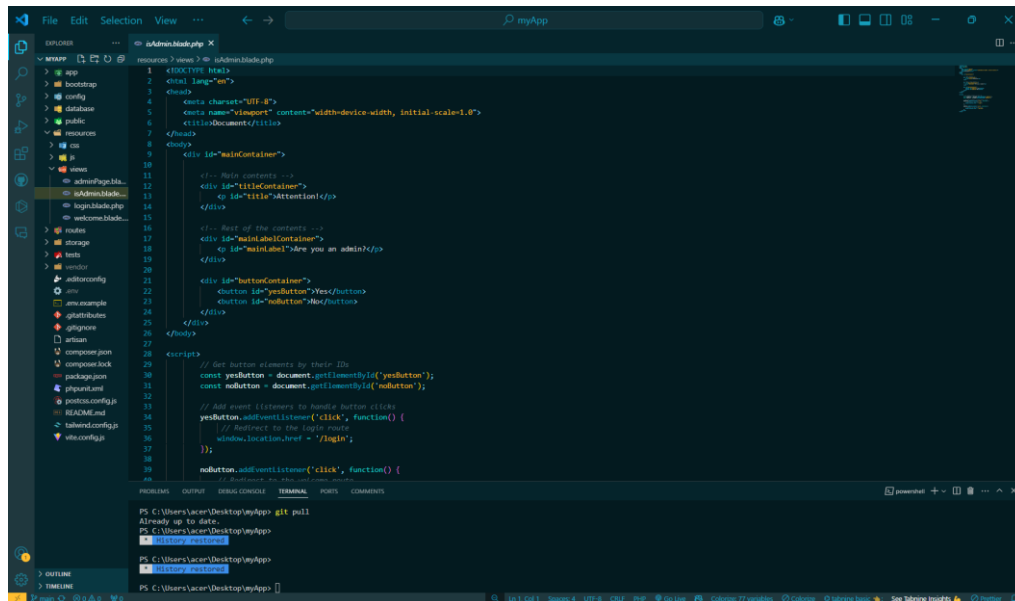

When the correct credentials for an admin account is entered, the username of the admin is dynamically fetched and displayed on the top left of the screen, on the navbar.

The routes for the Laravel application, it dynamically passes the username that the user entered into the view so it can be rendered.

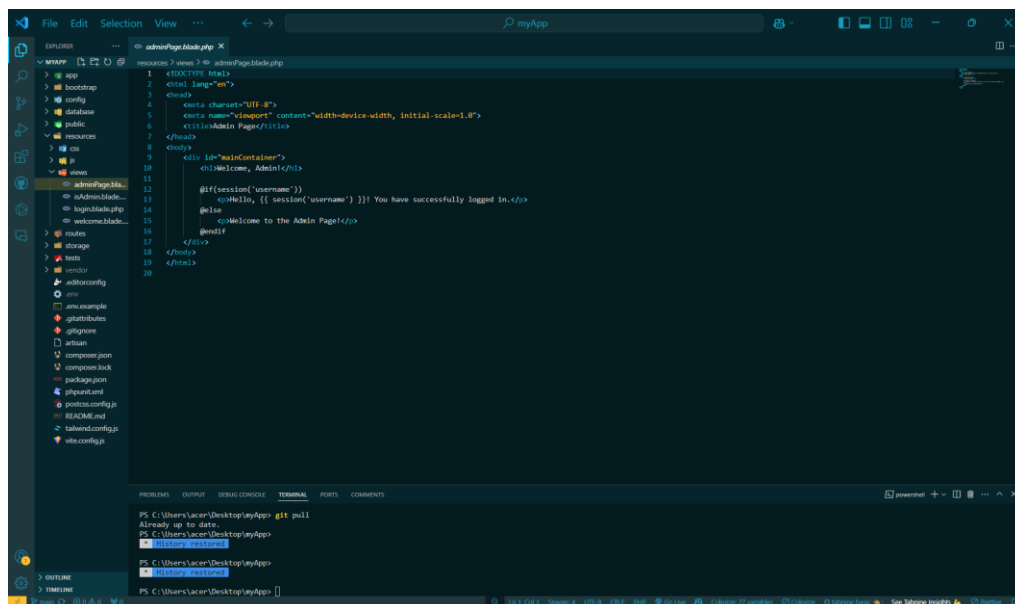

The contents of the isAdmin view, it is the display for the controller that checks if the user is an admin or not

```
1 <DOCTYPE html>
2 <html lang="en">
3 <head>
4     <meta charset="UTF-8">
5     <meta name="viewport" content="width=device-width, initial-scale=1.0">
6     <title><document>/title>
7 </head>
8 <body>
9     <div id="mainContainer">
10
11         <!-- Main contents -->
12         <div id="titleContainer">
13             <div id="title">Attention</div>
14         </div>
15
16         <!-- Rest of the contents -->
17         <div id="mainLabelContainer">
18             <p id="mainLabel">Are you an admin?</p>
19         </div>
20
21         <div id="buttonContainer">
22             <button id="yesButton">Yes</button>
23             <button id="noButton">No</button>
24         </div>
25     </div>
26 </body>
27 </html>
28
29 <script>
30     // Get button elements by their IDs
31     const yesButton = document.getElementById('yesButton');
32     const noButton = document.getElementById('noButton');
33
34     // Add event listeners to each button click
35     yesButton.addEventListener('click', function() {
36         // Redirect to the login route
37         window.location.href = '/login';
38     });
39
40     noButton.addEventListener('click', function() {
41
42     });
43 </script>
```

The logged in page where after successful login of the admin, the user will be directed to.

```
